DETAILED ACTION

1. This application has been examined. Pre-amendment A received on 11/14/2003 has been entered. Claims 1-40 are presented for examination.

Election/Restrictions

2. Restriction to one of the following invention is required under 35 U.S.C. 121:
 - I. Claims 1-20 are drawn to a computer network managing method and classified in class 709, subclass 223.
 - II. Claims 21-40 are drawn to a computer-to-computer session/connection establishing and classified in class 709, subclass 227.
 - III. The inventions are distinct, each from the other because of the following reasons: Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility, usable alone, such as the ability to manage network resources for resource request. Invention II has separate utility, usable alone, such as the ability to establish session/connection between network nodes. See MPEP § 806.05(d)
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
